Summary

Senior Software Engineer with 8+ years of experience owning and architecting scalable, conversion-driven user journeys across insurance and ed-tech platforms used by thousands of users daily. Specialized in frontend systems with strong exposure to backend integrations and working across the stack, including Node.js, TypeScript, and microservices architectures. Delivered measurable impact including **18% improvement in payment conversion** and **45%+ uplift in engagement**. Experienced in end-to-end delivery, collaborative development, and building reliable, production-grade systems.

Work experience

UI Engineer 2

2022 - present

ACKO INSURANCE

- Led and mentored a team of 5 engineers to architect and build a **Backend-for-Frontend (Node.js, TypeScript)** layer, enabling seamless communication between frontend applications and multiple microservices
- Owned end-to-end development of core product journeys including **Health Insurance Flow (Live)** and **Policy Analyzer (V2) (Live)**, collaborating with product managers, designers, and backend teams
- Increased payment conversion by **18% (77% → 61%)** through flexible payment options and robust handling of **70+ edge cases** across critical flows
- Designed and implemented a **state-driven chatbot system**, enabling real-time UI updates and improving user journey efficiency
- Followed engineering best practices including **unit testing (Jest)**, **CI/CD pipelines**, and **code reviews**, ensuring high-quality and reliable releases

Senior Software Engineer

2020 - 2022

BYJU'S FUTURE SCHOOL

- Built scalable platforms including **A/B testing systems**, **low/no-code campaign tools**, and **student-sharing infrastructure**, enabling rapid experimentation and growth
- Developed **AI-driven personalized video system (Rephrase.ai)**, improving trial class conversions by **45%+**
- Drove **32% growth in organic traffic** through SEO optimization and performance improvements across high-traffic platforms (Tynker.com)
- Designed and implemented a **real-time classroom interaction system (React, Agora)** enabling synchronized teacher-student interactions and improving engagement
- Migrated legacy systems (AngularJS, jQuery) to **React**, improving maintainability and extensibility
- Designed efficient data processing for REST APIs, enabling systems to scale to **millions of requests/deliveries**
- Mentored engineers through **pair programming**, **code reviews**, and **technical guidance**

UI Engineer

2020 - 2020

SUREIFY LABS

- **Architected and implemented a Server-Driven UI (SDUI)** system in React, enabling dynamic UI rendering and faster product iteration
- **Led development of a reusable React component library**, improving design consistency and developer productivity
- Built an analytics dashboard (React, Redux, MySQL), reducing analysis time by **10x**
- Collaborated with cross-functional teams to design scalable frontend systems aligned with backend services

TECHASPECT SOLUTIONS

- Built web applications including **e-commerce platforms and automotive solutions** using JavaScript, Vue.js, and jQuery
- Developed integrations with CMS platforms (**AEM, Sitecore**) enabling dynamic content delivery
- Improved system maintainability and onboarding efficiency through structured engineering practices

Skills

Languages & Frameworks:

JavaScript (ES6+), TypeScript, React, Vue.js, Node.js, Express

Backend & Architecture:

Microservices, REST APIs, Backend-for-Frontend (BFF), Distributed Systems

Engineering Practices:

TDD (Jest), CI/CD, Code Reviews, Agile (Scrum, Kanban)

Tools & Platforms:

Vite, Storybook, Git, MySQL, AWS (Basics)

Core Expertise:

Payments • Real-time Systems • Frontend Scalability • Performance • Conversion Optimization

Certifications

- [HackerRank \(Intermediate\)](#)
- [HackerRank \(Advanced\)](#)
- [Udemy Node.js](#)

Education

Bachelor of Technology, Computer Science Engineering

Aug 2013 - May 2017

Gokaraju Rangaraju Institute of Engineering and Technology

Grade: A

Data Structures and Algorithms, Operating Systems, Computer Security, Software Tools

Activities and societies: IEEE Society, Basketball, Carrom, Chess, etc.. among others
